Please describe the competing interests. These are not lessons learned from a textbook, and at times, they break the normal algorithmic convention of epilepsy diagnosis and treatment. Reference must be the article on which you are commenting. More information
Reviewed by Colin D Ferrie. To accomplish this goal, they solicited a single case from a number of well-known epileptologists, instructing them to include a commentary on what they learned and how it changed their clinical practice. Published November 29th by Informa Healthcare first published January 5th
It will appeal almost to clinicians with a particular interest in the subject, i
goal in launching this effort was quite simple: Related
