Tinnitus, a common symptom encountered in family medicine, is defined as the perception of noise in the absence of an acoustic stimulus outside of the body. Action on Hearing Loss has a tinnitus forum and provides further details about support and activities in your local area. If tinnitus is due to a health condition, your doctor may be able to take steps that could reduce the noise.

SubscribetooourNewstettertoorecieve:Getimmediateaccess,anytime. In addition to audiometry, patients with suspected arterial pulsatile tinnitus, retrotympanic lesions, or arterial bruits in the head should be assessed by head and neck computed tomography angiography. Hutt says this seems to take the pressure off the auditory nerves.
