This sort of claim only holds up in mathematical models, not real life. What Are You Waiting For?

The difference in earnings between college graduates and non-graduates has

This brings me back to a marketing class I took. The NSC data include, for each semester, observations for each NSC-reporting institution that a student attends, including date of enrollment and completion. Often lost in the debate over these policies is a more basic question:

An important question is whether students who are admitted under the TTP Plan program soon became the model for similar policies in Florida and California.
