In fact, knowing some physics opens the door for some really large misconceptions, some of which afflict even professional scientists. This myth came around through this simple but misleading thought experiment explaining entanglement: . But, Moddel warned, it is not generally thought by physicists that consciousness is necessary to collapse the wave-function. Originally published at [www.Ifyoulikedthispost,pleaseshare](#). But this is a matter of linguistics. We can apply this same metaphor to real qubits.

The light from the Sun is 8 minutes and 20 seconds old because it takes light 8 minutes to reach Earth. The observer effect in quantum physics is often seen as the most shocking and interesting aspect of quantum physics. At first glance, this does seem to be information transfer.
