The text is illustrated with a large number of diagrams and full-color clinical photographs. To generate insight into the mechanisms of exacerbation of pulmonary disease and to promote the discovery of future treatments, both animal models and human experimental models are described.

The vast majority of individuals with symptoms of rhinitis are managed in the Kay, Jean Bousquet, Pat Holt and Allen Kaplan have completely revised and updated the text, from both a scientific and clinical perspective. Accompanied by a complementary online version the work allows interactive multi-level learning and teaching with high state-of the art animations, hyperlinks, clinical case studies and interactive questions and answers with access to a continuously up-dated version of the book. Beginnings and Bibliographies of Clinical Ecology.

Cellular immuneresponses II: Randolph, who had been hospitalizing patients and testing them for their food sensitivities, found a critical element in many of his patients' recoveries was avoidance of environmental chemical exposures in their jobs and homes while in the hospital. Approaching the phenomenon of drug hypersensitivity in a comprehensive manner, this book aims to be of immense value to allergologists, dermatologists and anyone prescribing medication, as well as to scientists in the pharmaceutical industry challenged by the economic effects of failures in drug development or drug removal from the market.
