But I do see the possibilities that it can also be used in industry presentations. Instead of using small models or two-dimensional renderings, you can use immersive, three dimensional technology to design and replicate structures. But I do see the possibilities that it can also be used in industry presentations. For engineers, architects or other professionals whose work includes building or engineering large structures, virtual reality can help to save time and money. My vision is clear, concise, and a daily source of inspiration. This means more employee involvement without the cost and time sink of physical product testing. My mission statement fully reflects my values. What was once a skeptical consensus, digital transformation of business is generating a lot of value, through more automation, more intelligence, and ultimately more efficiency.
